

Gypsum panel moldings installed- same time as drywall!

1 Install gypsum crown molding flange ceiling & wall straight corner-to-corner

2 Tape crown molding & drywall flanges- no need for caulking or screw patches! Ready for paint!

3 Install drywall to follow the crown moulding flange.

4 Result works perfect for metal studs framing

5 Finished Product! huge savings in wasted materials & labor costs

THE PROCESS:

Our patented moldings feature the best results for new construction where there are many benefits to installing moldings before drywall/

We start by laser-leveling the gypsum crown molding flanges, and once those are straight and in place we plumb the baseboard molding to the crown. This assures that all flanges are level, plumb, and square. The drywall then follows the moldings flanges and everything is perfect.

And the painters have no caulking, and there are no nails to patch.

This makes everyone happy, and there are no complaints that the frame isn't straight. The saved drywall contributes to overall savings in materials and labor.

Gypsum moldings installed before drywall. It saves you tons of money.

New Patented Moldings that Install BEFORE Drywall!

Save Huge Money In Time & Material Costs!

Our New Patented Way

Only 3 pieces needed for appearance (regular= 7 pieces)
Installed crown molding pieces come in 12', 10' and 8' length.

- **A.** Install crown & FGR baseboard molding w/ 5/8", 1/2", or 1/4" molding flange
- **B.** Install panel moulding & dry wall between molding flange
- **C.** Tape molding flange & drywall joint. No need for caulking and no nails or screws to patch!

THE OLD WAY- 7 Pieces

7 pieces are needed on top, with 4 pieces on the bottom.

Much time expense is lost on caulking, wasted material, dust and man hours.

Installed crown molding finish ceilings with 1/4, 1/2, and 5/8 drywall.

NOW- ONLY 3 PIECES NEEDED!

You keep huge money savings without all the extra time, finish carpentry and materials costs!

Hi-tech Gypsum moldings installed before drywall are now your only real choice:

- Drywall hangers install them
- Drywall tapers finish them and they're ready to paint!
